# Summary of the occupational therapy profession in Europe 2015

## Message from the COTEC Executive

COTEC was established in 1986 by twelve OT associations with the purpose of co-ordinating the views of the National Associations of Occupational Therapists, providing strong voice for occupational therapy on European level. Today COTEC with a legal status as a Non-governmental organisation (NGO) represents 29 European Occupational Therapy Associations and more than 134,000 Occupational Therapists.

The aim of COTEC is to enable National Associations of Occupational Therapists in Europe to work together to:

- develop, harmonise and improve standards of professional practice and education as well as advance the theory of Occupational Therapy throughout Europe so to have distinctive profile of occupational therapy profession;
- enhance the visibility of occupational therapy in Europe by contributing solutions to health and social issues and promote inclusion, participation, health and well-being for all European citizens with occupational limitations and participation restrictions
- facilitate mobility and reduce labour market obstacles for occupational therapists.

The Summary of the Occupational Therapy Profession in Europe is a document compiled and updated annually from 1986 based on information supplied by the national associations. The Summary provides up to date statistical information about occupational therapy, the professional associations and working requirements in respective countries. It also includes information about education and regulation of the profession. This information can be a valuable tool for promoting occupational therapy as well as providing information for policy makers in both health and social arenas, at national and European levels as it provides a descriptive picture of OT profession.

The Executive Committee appreciates the continuing support from COTEC Member Associations in collating information for this document and would like to present The Summary of Occupational Therapy Profession for 2015.

<b>Serbia</b>	Strukovni radni terapeut Professional Occupational Therapist	OT Professional Issues, Congresses and Conferences, Events, National Association Communication	<a href="http://www.drts.rs">www.drts.rs</a>	OT Professional Issues, Student Section, Case Studies, Special Interest Groups Information, Congresses and Conferences, Events, Professional Development Courses, Policy updates, International News, National Association Communication, Multidisciplinary Matters	Section 1: Multiple problems regarding OT work places. In most institutions staff of other operating profiles (nurses, economy officers, special education staff...) are listed as OTs. They don't have OT professional qualifications or OT Diploma for that work place. Problem has been signaled to the Ministry of Health but have not received any answer from them, and the Association does not have support for resolving that major problem. 3.1 Ministry of education, Serbia 4.1 In Serbia we have another problem in OTs education. In Serbia, after graduation. OTs do not have opportunities for further improvement. The state has not yet approved the continuation of the study of OT. There so we have just OT Diploma which is 180 ESPB. 4.3 For now the Government is not interested in this field of education. 5.1 There is some 'holes' in our laws that someone use to work on OT workplace without registering. 5.2 (information from 2013) Komora medicinskih sestara i zdravstvenih tehnicara republike Srbije; ул.
